

Horizon Commercial Coverage Change for CGM

Purpose of this communication:

- To notify you of a change to the Horizon BCBS New Jersey (Horizon) commercial clinical coverage policy applicable to intermittently scanned (flash) Continuous Glucose Monitors (CGM).

What do I need to know?

- Under Horizon's commercial clinical coverage policy, intermittently scanned (flash) CGM devices are considered investigational and, therefore, are not covered for Horizon commercial members.
- Examples of intermittently scanned CGM devices are the FreeStyle Libre® Flash and FreeStyle Libre® Flash 2.
- This will apply to new requests for CGM's. If a Horizon commercial member already has a CGM that utilizes intermittent scanning capability, this change will not impact their supplies.

What do I need to do?

- Please redirect Horizon commercial members with a prescription for this type of CGM to their prescribing physician to discuss covered alternative devices.

Thank you in advance for your cooperation and continued partnership.
